Bracken's Brown Beauty Magnolia

Magnolia grandiflora 'Bracken's Brown Beauty'

- 🍃 **Form:** Dense Pyramidal
- 🍃 **Size:** 40' tall by 20' wide
- 🍃 **Growth Rate:** Mod to Fast
- 🍃 **Zone:** 5b-9
- 🍃 **Drought Tolerance:** High
- 🍃 **Salt Tolerance:** Moderate

Light Requirements: Full sun to part shade best in full sun

Soil Requirements: Well-drained, moist, fertile, humus rich soil that is well-limited; tolerant of slightly acidic soil

Bark: Smooth, brownish gray with young matures to grayish black

Flower: Fragrant, white flowers 6-8" wide; blooms May to September; attracts insects

Fruit: Red berries in a large, dry, hard, woody cone; sometimes considered mess

Foliage: Alternate, ovate to elliptical, medium to large-sized leaves; medium to dark green with a heavily felted dark brown back in Summer; old leaves turn yellow to brown and shed in Fall and again in Spring as new growth begins

Uses: Large specimen plant, mass planted as a large hedge or screen, naturalizing and lawn tree
