Flame Amur Maple

Acer tataricum ginnala 'Flame'

- 🍂 **Form:** Spreading upright
- 🍂 **Size:** 12' tall by 15-20' wide
- 🍂 **Growth Rate:** Fast
- 🍂 **Zone:** 3-8
- 🍂 **Drought Tolerance:** Moderate
- 🍂 **Salt Tolerance:** Moderate

Light Requirements: Partial shade to full sun

Soil Requirements: Can tolerate a wide variety of soils, is poor soil fertility, and pH adaptable. It might be best to choose a site with an acidic or neutral pH. If the soil is too alkaline, it can cause the tree to develop chlorosis.

Bark: Gray-brown and smooth on young branches, becoming slightly striped or fissured with age.

Flower: Fragrant, white, and arranged in loose clusters. Bloom time is April and May.

Fruit: Fruits are red, 3/4 -1" long, double-winged samaras.

Foliage: 4" long serrated and broad-ovate. They have a fresh, bright green color though the early spring and summer turning red in the fall
