

Pond Cypress

Taxodium ascendens

- 🌿 **Form:** Pyramidal
- 🌿 **Growth Rate:** Slow
- 🌿 **Drought Tolerance:** Moderate
- 🌿 **Size:** 30' tall by 50-60' wide
- 🌿 **Zone:** 5a-9b
- 🌿 **Salt Tolerance:** Moderate

Light Requirements: Full sun

Soil Requirements: Adapts well to most soil types, adapts well to wet areas, prefers low pH

Bark: Reddish brown, interesting exfoliating

Flower: N/A

Fruit: Brown round cone

Foliage: Needled conifer that has erect branchlets of bright green fern like needles. Turns bronze, orange in the fall

Uses: Screen, specimen, street tree, large parking lot islands, parking lot buffer strips. Good for urban areas; great to use in parking lots or medians; Cypress knees do not appear when planted in drier locations, but when growing in saturated soils conditions, knees may be produced
