

Taylor Juniper

Juniperus virginiana

- 🌿 **Form:** Upright Narrow
- 🌿 **Growth Rate:** Fast
- 🌿 **Drought Tolerance:** High
- 🌿 **Size:** 15-20' tall by 3-4' wide
- 🌿 **Zone:** 3-9
- 🌿 **Salt Tolerance:** Moderate

Light Requirements: Full sun

Soil Requirements: Adaptable but will thrive best in average solid that is somewhat moist. Needs well-draining soil.

Bark: Gray reddish-brown exfoliating bark

Flower: N/A

Fruit: N/A

Foliage: The dense semi-soft, blue green foliage.

Narrow landscape accent/specimen. Flank entrances. Large screen or windbreak. The natural form of the cultivar is tall, slender, and columnar with a pyramidal taper, the exact shape you would want from a coniferous evergreen hedge. Pruning may disrupt the cultivar's natural form.
